

Female Ministers Share in OECD Countries

Share computed as the number of female ministers over the total number of ministers – by OECD country and year

Share of Female Ministers

Year

Data source: Manifesto Project; from 1990 to 2023.

Counts are unweighted and the panel is unbalanced.

A general pattern of increase in the number of women is observable, with a few exceptions of a flatter trend.

The OECD average female ministers share is computed as the unweighted mean of all OECD members
